As a product designer with experience in Fintech and Logistics domain, I have shipped comprehensive products, in collaboration with developers. My curiosity, dedication, and problem-solving skills have aided me in this endeavour. My diverse set of skills and interests make me an asset to any team.

I've also learned motion graphics and HTML/CSS, continually expanding my skill set. I absolutely love what I'm doing and am actually excited about what future holds.

EMPLOYMENT HISTORY

Product Designer
at MarketWolf Securities Pvt. Ltd.

May '23 - May '24 (Fulltime)

Spearheaded a comprehensive application revamp, resulting in nearly a 100% increase in trade volume within 4 months. Took full ownership of 7 products, 4 of which are live, the remaining 3 in active development. I introduced better design practices for a team of 7, including auto-layout, components, and micro-animations in Figma, significantly improving design efficiency and consistency.

Product Designer
at CodeQube AI

Dec '23 - Feb '24 (Freelance)

Designed the entire product suite, including customer and vendor applications for both mobile and web platforms. Detailed in 'work'. Wireframes were provided and I was responsible to design the UI based on them. I pitched to include me in the ideation process for better UX and less design revisions.

UI/UX Designer
at Futurewise Technologies Pvt. Ltd.

June '22 - May '23 (full-time)

I created a broader style guide. Brought a user centric approach to designing multiple new modules. Got all design related things done including marketing collaterals. Animated the login graphic (using rive) after the outsourced agency failed to.
